

The Great Global warming myth! - a modern "Lying Wonder"

If TRUTH is important to you read on!

John 8v44 Jesus said (the devil) "is a liar and the father of lies".

John 16v13 Jesus said "but when he the Spirit of Truth comes, he will guide you into **all** truth"

2Thess2v9 Paul said - The Lord shall consume...."even him, whose coming is after the working of Satan, with all power and signs and **lying wonders**".

What is today's "lying wonder" - the mass belief that Global warming is induced by man made greenhouse gases - that the solution is to give up our prosperity and liberties to corrupt governments so they can "save" us. Why is it important for believers to get this issue right? Not only does your liberty and future depend upon it - Christians have now been given unprecedented opportunity to identify Satan's strategy, his minions, his liars, his media and political machinery and expose even his "useful idiots" for what they are! If you see thru this one "lying wonder" you may see through them all, you can identify his mouthpieces. There is an assumption being fed to us that there is a consensus on Global warming - it is a Satanic lie! One California mother says her daughter has seen Al Gores "an inconvenient truth" no less that four times in State School. Youth are being brainwashed all over the English speaking world.

Now if you profess to be a believing Christian but are sitting here in amazement at this atrocity that has just landed in your in-basket pray a simple prayer - ask the Holy Spirit to lead you into truth on this issue (and then others).

A little background, before we allow the experts to debunk the myth. The most authoritative source for this "lying Wonder" is the IPCC, the Intergovernmental Panel on Climate Change of the United Nations established in 1988. This is the body that won the Nobel Prize with Al Gore in 2007 for assembling and disseminating "greater knowledge about man made climate change". IPCC reports that there is a "consensus" amongst 2,500 Scientists that man made greenhouse gases are "very likely" contributing to climate change. In reality there is not a complete consensus. These named scientists only apparently agree 50 to 80% of the time.

12th December 2007 the US Senate released a report of over 400 Scientists, many of those whose names had been attached to the IPCC report without permission. This report expresses a range of views from scepticism to complete rejection of the IPCC theory of global warming. Patrick Michaels Professor of environmental Sciences at the University of Virginia (1) was reportedly so appalled at the IPCC methodology he threatened the UN with legal action to get his name removed from their report - remember this was the report that earned IPCC the Nobel Peace Prize.

Believers can often identify the "Big Lie" by the "Chorus". In the early 80's the "Chorus" was the mass media and leftist politicians ganging up on South Africa, a Nation where over 90% of citizens professed Christianity. The latest "Chorus" is dire threats that the world is coming to an end because of man made "greenhouse" emissions. The **clear agenda** is that we must give up both our prosperity, and our liberties, to big Government to "save" us from an imaginary disaster.

There seems to be more integrity in elements of the British Press (despite more filth) so I often read Britain's news online. In recent months there have been several reports of threats and

intimidation to Scientists and climatologists who are global warming sceptics. There is a consensus of qualified people saying they are unable to speak out against the global juggernaut of opinionated politicians, environmentalists, pundits and the like who are completely intolerant of legitimate scepticism. A letters debate in our local (CDN) newspapers amounts to hysteria and intimidation. A UK newspaper reported over 120 people have been treated for mental disorders related to a complex about their personal carbon footprint. Britain's "Telegraph" has reported on Global Warming scepticism and associated hysteria. An excellent article is referenced below from the UK's "First Post". Britain's Labour Government is mounting yet another tax attack on the UK's heavily victimised car owners and it is based on fraudulent science. Canada and the USA can expect more of the same.

Recently there were headlines that "Global warming is delayed" in the UK. I expect the same is likely here. There are now reports of satellite data that shows there have been no changes in temperature since 1998.

Very recently Dr. Arthur Robinson (2) of the Oregon Institute of Science and Medicine announced to the National Press Club in Washington DC that more than 31,000 scientists have now signed the "Oregon Petition" rejecting the IPCC position about climate change. 7,000 of these have been personally verified to have PHD's.

4th March 2008 500 Scientists agreed on the "Manhattan Declaration on Climate Change" (attached) debunking the now conventional wisdom that climate change is man made. The enquiring believer can not only discern that there is no consensus but can also discern our mass media is a "Chorus" of lies.

WHY?

Satan, A religious being, wants to be worshipped by man. Many extreme environmentalists are worshippers of Mother Earth some call it Gaea. They are inextricably linked to Satan the "Prince of the power of the air". The pending artificial "Global warming environmental crisis" is designed to produce a belief that we must give up our liberties and centralise Government controls. Examples of this are the Kyoto Accord and the UN efforts to produce a one world religion (Johannesburg 2002). They are a linked strategy.

Last week President Bush order to continue building strategic oil reserves for US Armed Forces was overturned by Congress. The Satanic strategy is to produce a "One World Government". Satan hates all of God's creation and wishes to enslave mankind to worship him. The world's single biggest user of Oil is the US Armed Forces. Whether you like America or not they have been defending Christian liberties since the Barbary Wars in 1810. The US Marine Corps has an explicitly Christian Warrior ethic. Deny Oil to the US and they cannot defend liberty. Newt Gingrich in his report "Drill now, drill here, pay less" reports known reserves of over 100Trillion barrels of Oil. A huge deposit lies in shale reserves in Colorado. On spurious environmental grounds the Democrat controlled Congress has just denied funding to write regulations for environmentally safe recovery of the Colorado Oil. Environmental issues also prevent recovery of huge deposits on the Alaska North Slope.

To put it simply the US and Canada have sufficient known oil reserves to burst the current oil bubble. Current UK reserves, although declining, are hampered by a confiscatory tax regime preventing further exploration and development.

CLIMATE CHANGE

Climate change is a fact of History and a constant. In the 10th Century Viking explorer Eric the Red discovered Newfoundland, calling it Vinland (Vineland) . It's warm climate was then growing grapes. When re-discovered 700 years later, its climate was far too cold to grow grapes. The graph that shows a temperature spike in that Century, often used by environmental advocates, has fraudulently eliminated the "inconvenient" heat spike. Currently some legitimate scientists are saying we are in for a "cooling period". Certainly this has been the worst Canadian winter I have ever experienced since 1969 and local news reports say the worst in Canada in 30 years. In 2006 I was in Mississippi on assignment post Hurricane Katrina. The "experts" estimated 26 Hurricanes for the 2006 season due to increased global warming and sea temperature. We had five! Reputable scientists say the single most important factor in world climate is sunspots, not greenhouse gases. Dear believer Who controls the sunspots?

WHAT CAN YOU DO?

Forward this article.

Pray pray pray for your City, Province or State, and Nation and ask that it not buy into Satanic deception over global warming, carbon credits etc.

Ask God to give you the Holy Spirit of truth and the ability to discern Satanic lies on other issues..

View News reports and political pronouncements with caution and even suspicion.

DO NOT ACCEPT that you must compromise on hard won liberties or God given prosperity

DO NOT ACCEPT guilt trips for carbon footprint, automobile use etc.

To the best of my ability I have researched and corroborated the facts and individuals named in this article. It is designed to be forwarded.

(1) Professor Patrick Michael - Wikipedia reports - does not necessarily disagree with global warming, just that it has a detrimental impact. (Several scientists argue it's impact may in fact be beneficial).

(2) Dr. Robinson - Wikipedia reports is an "avowed Christian" a former colleague of Linus Pauling he has excellent personal credibility.

Has been attacked because "Perry Mason" signed his petition. Mr. Mason is indeed a living real person with a PHD.

Manhattan declaration - file attached

Manhattan declaration - see

http://my.telegraph.co.uk/ahjanwater/april_2008/manhattan_declaration_on_global_warming.htm

Oregon petition on climate change - see <http://www.oism.org/pproject/>

Scientists question climate change consensus - First Post

<http://www.thefirstpost.co.uk/37938,features,whatever-happened-to-the-climate-change-consensus>

Finally how did this article impact you?

Emotional - the writer is an idiot

Intellectual - I am well informed, I have read the reports - guy does not know what he is talking about

Spiritual - there is truth in this, I will seek confirmation in two or three witnessess (including the Spirit of God within you). Praise God for YOU can change the world.
